Afternoons at Arbors

More than fifty 4th and 5th graders from Bretton Woods Elementary School's Community Service Club have made it their mission to spend quality time with senior citizens at The Arbors at Islandia East. The students are making a difference in their community by visiting this assisted living complex, where they enjoy reading and conversing with the residents, three times a month from November until April.

In addition to providing the residents with an opportunity to form bonds with the children, the visits serve as living history lessons for the students, where history book subjects such as Jackie Robinson's historic major league baseball career and World War II are brought to life.

"This long-standing inter-generational event benefits seniors and children alike. Both the residents and students really look forward to this special time with each other," said Mrs. Barbara Leventhal, fifth grade teacher and the program director.

The program, now in its 18th year, has received recognition from the Suffolk County Executive on several occasions, including a Citation received from former Islip Town Supervisor Phil Nolan.
